

Insecticides

BUG BUSTER (#AI41) Insect killer. A water-based insecticide formulated with the synthetic pyrethroid, Resmethrin and Esbiothrin SBP-1382® to be highly effective on flying and crawling insects. The powerful mist spray provides a wide coverage with fast knockdown. A cherry blossom fragrance makes it pleasant to use. This product is an excellent choice for use in food handling and processing facilities. Can be used for both inside and outside applications. USDA F1.

Cherry Blossom Fragrance

12-20 oz. cans per case.

FOGGING INSECTICIDE PF (#LI5G) PF Fogging Insecticide PF is designed for use in a fogging or misting machine. Fogging Insecticide PF is perfect for fogging or space spraying of growing houses, food processing plants, bakeries, restaurants, etc. Fogging PF is a synergized Pyrethrum ready-to-use in equipment designed to deliver a true aerosol mist. Pyrethrins are natural insecticides found in daisy-like Chrysanthemum flowers grown and harvested in Kenya, Africa and Australia.

Fogging Insecticide PF Features: * Repells most insects * Safe for use in food plants * Satisfactory usage around mammals and birds * Pyrethrin and the synergists are biodegradable * Rapidly disintegrate in sunlight and air

Fogging Insecticide PF Uses: * Use in a fogging machine * Use in a misting machine * Perfect in growing houses, food processing plants, bakeries, restaurants, etc. * Food processing establishments * On animals to protect beef and dairy cattle and horses

FOGGER, CARE TRI-JET (#F575): Chemical fogger or humidity control is simple with the “Tri-Jet” Fogger. The combination of adjustable valve and the tornado action nozzle allows you to maximize mist up to 30 feet directionally. The versatility of this unit allows you to fog with both water and oil base materials and may be used either indoors or outdoors. Works with the Fogging Insecticide PF.

Insecticides (Cont.)

STERI-FAB (#LG8) Sterifab acts as a contact kill on bed bugs and other insects using a combination of a synthetic pyrethroid insecticide and isopropyl alcohol. Sterifab also acts as a bactericide, fungicide, sanitizer, viricide, mildewcide, germicide, deodorant, bacteriostatic, and fungistatic. Because Sterifab does not leave any residual, it can be applied virtually anywhere. Simply shake well, then apply to desired treatment areas. Insect mortality is imminent for those contacted with Sterifab spray. Disinfection generally occurs within 10 minutes of spraying.

Steri-Fab is considered a professional do-it-yourself pest control (diy), exterminator and extermination pesticide, chemical and bug killer treatment products to spray, exterminate and eliminate pests.

Recommended Dispensing Option

HANDEE™ PUMP UP SPRAYER (#F515) Portable, heavy-duty pump-up sprayer for dispensing cleaning solutions in areas with no water hose connection. The economical choice to a mobile cleaning system.
